

5 STEPS TO CREATE A SMALL GREEN ROOF

01

MAKE SURE YOUR ENVIRONMENT IS SAFE AND YOU HAVE ALL THE TOOLS YOU NEED. WE WOULD SUGGEST:

- PROTECTIVE GLOVES,
- A SHARP KNIFE OR A SAW
- A TROWEL AND BUCKET
- A RULER

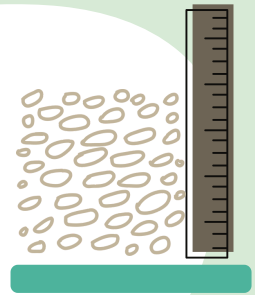

02

CUT THE FLEECE TO THE SIZE REQUIRED AND LAY IT DOWN WITH THE RIBBED SIDE DOWN TO ALLOW FOR DRAINAGE

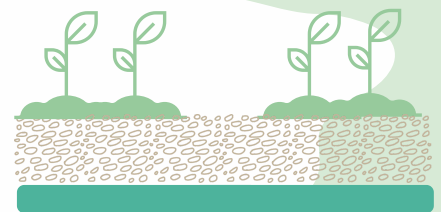

03

USING YOUR BUCKET ADD THE SUBSTRATE ON TOP OF THE FLEECE TO A DEPTH OF 80mm - 120mm

04

PLANT YOUR SEDUM PLUG PLANTS OR WILDFLOWERS 20 TO 30 PER SQUARE METER.

05

WATER YOUR ROOF REGULARLY FOR 3 WEEKS AND DURING DRY SPELLS. IT CAN TAKE UP TO 3 YEARS FOR PLANTS TO FULLY ESTABLISH.

YOUR GREEN ROOF IS LOW MAINTENANCE, NOT NO MAINTENANCE - IT IS A GOOD IDEA TO FERTILISE IN SPRING AND TRIM AND WEED IN AUTUMN. CONSULT THE GRO CODE WWW.GREENROOFORGANISATION.ORG
